

To Whom it may concern:

When last I looked, we live in a free, democratic society where the public has the right to listen and watch any channel for any type of service. I find it appallling that the NAB is trying to put limits on the XM Satellite service. I believe that choice is still one of the freedoms that we hold close to our hearts, and your desire to limit those choices certainly goes against all that we hold sacred in this country.

Yours truly,

Joel M. Neiderman
